

## Confirmation of compliance POP (EU) 2019/1021

Regulation (EU) 2019/1021 on persistent organic pollutants (POPs) regulates the placing on the market, use and disposal of certain persistent organic pollutants at European level. The aim of the Regulation is to minimise or completely prevent the release of these substances, as they pose a particular risk to humans and the environment due to their persistence, bioaccumulation and toxicity.

Annexes I and II of the Regulation contain binding prohibitions and restrictions for a number of POP substances. These annexes are regularly updated by delegated acts of the European Commission to take account of new scientific findings, international decisions (in particular from the Stockholm Convention) and regulatory developments.

Based on the information available to us regarding the materials, precursors and supply chains we use, we confirm that the substances listed in Annexes I and II of Regulation (EU) 2019/1021 are not contained in our products and that their use is not subject to the applicable prohibitions or restrictions.

**approved by**

Möller-Industrietechnik GmbH / Möller-Metalldichtungen GmbH  
Brunnenweg 10, 39444 Hecklingen

**revision**

05

**date**

09.02.2025

**signature**

This letter has been generated automatically and is valid even without a signature.

**validity**

This confirmation is valid until revoked. It will be reviewed regularly and updated immediately as soon as new findings from our supply chain or changes to the relevant POP regulations make this necessary.

This confirmation of compliance applies to Möller Industrietechnik GmbH and Möller-Metalldichtungen GmbH. Both companies use a common material compliance structure, identical supply chain assessment processes, and centralized supplier communication. The contents of this confirmation of compliance have been independently verified for both legal entities and apply equally to both.
